

Precipitação provável para o município de Afrânio-PE em diferentes níveis probabilístico

Edgo Jackson Pinto Santiago ¹, Luciano Pereira da Silva ², Frank Gomes-Silva ³, Antonio Samuel Alves da Silva ⁴

Abstract: *The aim of this study was to determine the expected rainfall at different levels of probability for the municipality of Afranio, aiming to define a better time for rainfed planting and lowering of Caatinga woody plants for the pastoral management of ovine and caprine animals extensively raised in the region.*

Keywords: gamma distribution; rainfed agriculture; semiarid; management of the caatinga; irrigation.
