

An empirical analysis of Entrepreneurship: Need or Innovation?

Rafaela da Silva Gomes¹, Vitória Régia Lopes dos Santos², Luciene Resende Gonçalves³

Abstract: This paper aims to conduct a discussion about the differences between informal work and entrepreneurship and perform a multiple linear regression analyses with the purpose of verifying which variables can decrease or increase the entrepreneurial activity. We compared 52 countries present in the GEM studies. All the assumptions were met.

Keywords: Entrepreneurship, informality, competitiveness
