

ANALYSIS OF REPEATED MEASURES IN SANTA INÊS SHEEP USING THE MIXED MODEL

Rita de Cassia Oliveira Barboza¹, Adriana Regina Bagaldo¹, Kuang Hongyu², Fabiane de Silva Lima¹

Abstract: The objective of this work is to discuss and analyze longitudinal data in animal experimentation with Santa Inês sheep exposed to four different treatments through statistical methodologies. The analysis of the measures was performed with the aid of the free software R and SAS.

Keywords: Repeated measures, mixed model, sheep.
