

## **Analysis of Swine Weaning Time Using The Generalized Gamma Distribution**

**Fellipe Tavares Nogueira Cruz<sup>1</sup>, Marcelino Alves Rosa de Pascoa<sup>2</sup>, Carlos Alberto de Souza Gondim<sup>3</sup>**

**Abstract:** In this job was made the adjust of generalized gamma distribution by the method of maximum likelihood using data about weaning of pigs. The adjust was compared with exponential distribution by the likelihood ratio test and statistics AIC, BIC and CAIC.

**Keywords:** Generalized gamma; exponential; survival analysis; maximum likelihood.
