# Application of the Logistic Regression Model in Learning Analytics

**Olga L. Anglas R. Tarumoto[1], Thais Tomé Carvo[2], Mário H. Tarumoto[3]**

**Abstract**: The data used in this work, were collected in the Virtual Learning Environment (Moodle). We applied Logistic Regression model to predict if a student will dropout or failure in the discipline in the distance learning modality. The final model presented hit rates above 90%.

**Keywords**: Learning Analytics, Virtual Learning Environment, Distance Education, Logistic Regression.
