Autoregressive vectors applied in determinants of Brazil-China exports between the years 2010-2016

Michael Gonçalves da Silva[1], Vanessa Siqueira Peres da Silva [2], Patrícia Menezes da Rosa [3]

Abstract: The study analyzed the determinants of Brazilian exports of commodities to China in the recent period from 2010 to 2016. It was verified that the influences of international prices and the real exchange rate were the main determinants of the Brazilian economy's commodity exports in the period analyzed.

Keywords: Regressive Vectors; exchange rate; commodities.
